

The map displays the United States with state boundaries. Sampling locations are marked with colored circles and 'X' symbols. The colors used are pink, purple, blue, green, yellow, orange, and red. The 'X' symbols are also colored to match the circles. The locations are distributed across all states, with a higher density in the eastern half of the country. A legend in the bottom right corner identifies the symbols: 'X' for 'Sampling locations' and colored circles for 'Sampling locations'.
